

U.S. KIDSGOLF

Fitting Your Young Player

At U.S. Kids Golf, we believe that perfect swings begin with a perfect fit. When a young player uses clubs that are fit based on their height and skill level, they will learn to swing naturally, while increasing their swing speed and developing good habits. U.S. Kids Golf offers three systems of lighter weight equipment designed to fit every young player, regardless of age. To learn more about the Yard Club, Ultralight, and Tour Series, watch the video below.
